Assignment 2

Course Title: Elements of Environmental Sciences (ENV103), Fall 2023

Topic:

Climate change is one of the most pressing issues in the world right now. With global temperatures rising at an alarming rate, and with the drastic changes in the seasons, it is clear that climate change is bringing about many destructive changes in our world. The most pressing issue due to climate change is the effect it has on the earth's water supply. This can be observed globally, as the hydrological cycle is affected and the frequency of water related hazards are increasing, thus having huge social impacts. In Bangladesh, we can observe that this results in scarcity of fresh drinking water and the leaching of salt water into fresh water systems alongside the global issues.

Now prepare a poster on the following topic: - “A Global and Bangladesh Perspective on Water-Related Issues due to Climate Change.”

Contents:
